DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 1, 3 and 5 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Limiting the ionic liquid to 20 parts is considered new matter. It is unclear as to where this limitation is supported and applicants have not pointed to support in the specification. As such, this is considered new matter.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1,3 and 5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Michot et al US 6,841,304.
5. The rejection set forth in the paper mailed 12/15/08 under 35 USC 103 is deemed proper and is herein repeated.

6. Applicants newly amended claims and remarks filed in support thereof have been fully considered but have been found not persuasive.
7. Applicants have amended claims to limit the amount of ionic liquid to 20 parts. It is argued that the art uses more ionic liquid and fails to show a stable rubber member as claimed. This is not persuasive.
8. The claims are drawn to a "member". There are no stability limitations relative to the member. The art shows electrodes formed from the composition. The electrodes are seen to read on the claimed members. Further, the amounts of ionic liquids used in the examples do not limit disclosure. It is obvious to use lesser amounts of ionic liquid and obtain a product having expected properties. It is further obvious to arrive at optimum proportions by obvious experimentation. There remains no showing or allegations of unexpected results due to the claimed amount of ionic liquid.

Conclusion

9. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
